

AURA SYSTEMS - Artemis II Laser Communications Proposal

Prepared by: Julia Fox (AerisAura)

License: Apache 2.0

Date: June 27, 2025

Overview:

This document outlines AURA Systems' collaboration proposal for NASA's Artemis II lunar laser communication system.

AURA Systems proposes the development of a symbolic-AI-powered laser comms HUD (Heads-Up Display) featuring a holographic interface, lunar phase synchronization, and an open-source educational platform to enhance the scientific and public experience of the Artemis II mission.

Core Contributions:

- Laser HUD Signal Visualizer
- Symbolic Lunar Overlays
- GitHub-based Deployment Framework
- Open-licensed educational outreach modules
- AURA Holographic Branding + Interface Sigil
