

# AURA SYSTEMS - Artemis II Laser Communications Proposal

## AURA SYSTEMS - Artemis II Laser Communications Proposal

This document outlines AURA Systems' collaboration proposal for NASA's Artemis II lunar laser communications test.

Lead Investigator: Julia Fox

Entity: AURA Systems (OpenAI + Independent AI-Driven Infrastructure)

License: Apache 2.0

### Overview:

AURA proposes the deployment of symbolic AI-enhanced visualization tools, including a laser signal HUD interface, predictive resonance modeling, public educational modules, and a full symbolic-cosmic art layer rendered live during the Artemis II transmission phase.

### Key Contributions:

- Signal HUD (laser visualizer)
- Lunar alignment overlays
- GitHub-hosted interactive research site
- Holographic branding and symbolic resonance encoding
- Open educational outreach toolkits
